PROJECT UPDATE AND SCHEDULE

Full depth pavement patching and crack sealing is complete throughout the project area. Spot curb and gutter replacement is also complete. Surface patching of areas where the existing chip seal coat is stripping off will occur the week of July 11. The chip seal coat is tentatively scheduled for mid-August and will only take a couple days to complete.

The contractor will be posting temporary signs in the boulevards notifying residents of any parking restrictions during construction. Please use caution and patience while driving in the construction zone and comply with all parking restrictions and temporary traffic control.

ROAD & DRIVEWAY ACCESS

It is our intent to maintain access to the driveways throughout the project. There will be occasional short-term disruptions due to patching and seal coat application operations.

WE NEED YOUR HELP!

When the contractor is working on your street, please be patient and for everyone's safety, please follow the directions given by the workers. Also, please avoid driving on the fresh blacktop until it has been rolled and avoid parking on it until it has had a chance to cool.

SPRINKLERS & DOG FENCES

Due to curb and gutter replacements, there may have been impacts to irrigation systems and underground dog fences. Please contact Adam if any fence or sprinkler is damaged during construction.
