**JUNE
2024**

PROJECT SCOPE

The project consists of milling the surface of the roadway, crack repair, patching areas of pavement failure and then paving a bituminous overlay. Broken and settled concrete curb and gutter and ADA deficient pedestrian ramps will be reconstructed prior to milling of the surface.

There are no direct assessments to property owners on this project.

SCHEDULE UPDATE

FULLER STREET/KOEPER AVENUE – Fuller Street/Koeper Avenue will receive a mill and overlay from approximately 800 feet south of the Caspian Lane/High School back entrance intersection to the Highway 169 overpass bridge.

The contractor anticipates starting removals of pedestrian curb ramps and deficient concrete curb and gutter the week of June 10th and reconstructing the pedestrian curb ramps and curb by the end of that week. A concrete median and designated crosswalk area will be added in the area just north of Appaloosa Avenue.

Irrigation repairs and turf restoration will begin after all concrete is installed.

Milling of the bituminous roadway will begin the week of June 24th and paving to take place that same week.
